

# ATLAFEN 10 %

#### **ORAL SUSPENSION**

## **COMPOSITION**

Fenbendazole	10 ,00 g
Excipient qs	

#### PHARMACEUTICAL PROPERTIES

Fenbendazole is an anthelmintic from the benzimidazole family with great activity against gastrointestinal and pulmonary nematodes and on the taenia. Fenbendazole, like other benzimidazoles, works by inhibiting the polymerization of microtubilin, causing cell disorganization and death of the parasite by starvation. From a pharmacological point of view, fenbendazole is metabolized in the body into several metabolites including oxfendazole, which has great anthelmintic activity.

#### TARGET SPECIES

Equines and cattle.

### **INDICATIONS**

Treatment of gastrointestinal and pulmonary stongyloses and tapeworms in cattle and horses.

#### ADMINISTRATION AND DOSAGE

Oral administration in single administration at a dose of 7.5 mg / kg of bodyweight, ie 7.5 ml / 100 kg of bodyweight.

## CONTRAINDICATIONS AND INTERACTIONS

Do not combine with bromo salicylanilides douvicides.

## SIDE EFFECTS

If the general conditions of use are respected, no side effects are observed.

## PRECAUTIONS FOR USE

- Adopt the prescribed dosages in females at the beginning of gestation.
- Shake well before use.
- Do not smoke or eat while using the product.
- Wash hands thoroughly after using the product.
- Keep the product out of the reach of children.
- Destroy the bottle after use.

## WITHDRAWAL PERIOD

Meat and offal: 14 days. Milk: 72 hours

#### STORAGE CONDITIONS

Keep the product in the original packaging, protect from light and at a temperature  $\leq$  25  $^{\circ}$  C.

# **PRESENTATIONS**

Bottles of 100 ml and 1 liter
